

Rheinmetall LAND 400

Seeking businesses:

Any supplier would have to have a quality management system in place such as ISO 9001 for example.

- Systems and Electrics;
- Structure and Equipment;
- Mechanical components;
- Hydraulic components;
- Assembly of modules;
- Deeper Maintenance, Repair and Overhaul (MRO);
- Simulator components;
- Transport and Specialist Logistics;
- Document Translation;
- Technical Documentation;
- Health Usage Monitoring Systems (HUMS);
- Video Recording and Processing;
- Computing and Networking Systems;
- Cabling/Looms;
- Radar Systems and Components;
- Vehicle Intercom Systems;
- Camera Systems;
- Inertial Navigation Systems/GPS solutions;
- EMC/EMI Testing;
- Test and Evaluation Support; and
- Logistics and Sustainment.
- Cutting and Bending
- Armoured steel
- Steel / metal fabrication with experience with working with small tolerances and precise measuring/monitoring equipment
- Welding expertise – qualifications such as 3834 would be advantageous
- Machine shops / machining

- Surface treatment
 - PCB
 - Cables and harness
 - Box building
 - Optronics / electro-optical expertise
 - Pneumatics / hydraulics
-
- Longer term, there could be opportunities in through life support, repair and overhaul, maintenance and servicing.
 - The list is not exhaustive and any interesting capability with a potential interesting utility would certainly merit consideration.
 - There is opportunity for SMEs to be tier 2 / 3 suppliers into our broader supply chain, so opportunities exist to be incorporated at all levels.
